

Don't just identify exceptions. Correct them!

System Exception Manager empowers you to tackle issues when and where they arise

Exceptions management is a critical process that focuses on identifying and resolving discrepancies—between the product and its associated data—that arise during production and distribution. With DSCSA enforcement looming, **the volume of errors is expected to increase five to ten times!**

Effective exception management extends beyond identifying issues—it requires the ability to swiftly resolve data exceptions as well as product and misalignment exceptions from things like returns, overages and duplicate serial numbers. Addressing these issues quickly is vital to minimize supply chain disruptions and ensure timely delivery of your products to patients.

Exception Manager: A complete solution that goes beyond identifying the issue

Our Exception Manager solution leverages Systech's expertise in providing strong rework capabilities across the entire stack (L1-L5) to help you correct errors—whether related to data or physical product discrepancies—seamlessly without impact on production.

- Enable compliance
- Reduce manual resolution effort
- Enhance efficiency with automation
- Minimize supply chain disruption

Systech delivers the unique ability to manage exceptions swiftly, wherever they arise... on the line, in the warehouse and across your supply chains.

“ As a full-stack L1-L5 provider, Systech leverages its solution to streamline data from all sites and handles rework using a simple, cloud-based tool with no adverse impact on production. ”

– **Rick Seibert**
SVP, Sharp Packaging

System Exception Manager

Tackle exceptions quickly, wherever they arise

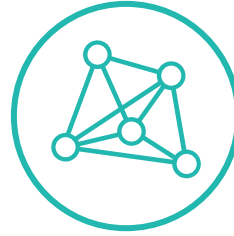

AUTOMATE

Built-in data inspector reduces resources and manual tracking.

ANALYZE

Central access to file and data exchange status for transparency and root cause.

COLLABORATE

Automate notifications to trading partners and regulatory authorities.

REWORK

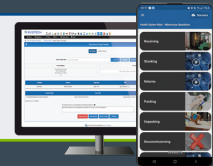

Enhanced efficiency with multiple rework platform options.

Turnkey rework across the stack

Enhanced efficiency with multiple platform options

- First to market with intuitive packaging rework and mobile supply chain rework.
- Perform in lot, post lot and supply chain rework to address product and misalignment exceptions wherever they arise.
- Multiple platform options (PC, mobile, Cloud UI).

Rework in the **supply chain**

Rework in the **warehouse** (post-lot)

Rework on the **packaging line** (in-lot)

Implement unrivaled exception handling. Contact us to get started...

Identify. Trace. Trust.

Traceability and serialization solutions to drive efficiency, achieve compliance and protect your brand.
